PROFESSIONAL SUMMARY

DevOps Engineer with professional experience in CI/CD automation, Docker, Kubernetes, Jenkins, Git, Ansible, Bash scripting and Linux operations. Currently working as a Junior DevOps Engineer at Vytrixtech, focusing on CI/CD, containerization, Kubernetes deployments, automation and Linux-based operations.

CORE SKILLS

CI/CD	Jenkins, Git, GitHub
Containers & Orchestration	Docker, Kubernetes
Automation	Ansible, Bash Scripting
Operating Systems	Linux
Monitoring	System monitoring & performance optimization
Concepts	Application deployment, automation, troubleshooting

PROFESSIONAL EXPERIENCE

Junior DevOps Engineer – Vytrixtech

Full-time | Nov 2025 – Present | Bengaluru, Karnataka, India | Remote

- Build and maintain CI/CD pipelines using Jenkins and Git.
- Build, manage, and troubleshoot Docker containers.
- Deploy and manage applications on Kubernetes clusters.
- Automate deployment and operational tasks using Ansible.
- Develop Bash scripts for automation and repetitive operational tasks.
- Perform Linux system troubleshooting and support application deployments.
- Troubleshoot build, deployment, Docker, and Kubernetes-related issues.

DevOps Engineer (Freelance) – Self-employed

Freelance | Nov 2024 – Oct 2025 | Pune District, Maharashtra, India | On-site

- Provided DevOps support and automation solutions for client-side projects.
- Implemented CI/CD pipelines using Jenkins and Git.
- Automated infrastructure and deployments using Ansible and Bash scripting.
- Containerized applications using Docker and deployed on Kubernetes clusters.
- Involved in system monitoring and performance optimization.

Software Engineer – Stezier Technology Consulting Pvt. Ltd.

Full-time | Jul 2024 – Oct 2024 | Pune District, Maharashtra, India | On-site

- Worked with Linux environments.
- Worked with CI/CD workflows.
- Supported software development and deployment activities.

PROJECTS

- **CI/CD Pipeline:** Automated builds and deployments using Jenkins, Docker and Kubernetes.
- **Monitoring Stack:** Centralized logging and dashboards using Loki and Grafana.
- **Multi-tier Application:** Sample application deployment using Docker, Terraform, Jenkins and Kubernetes.

EDUCATION

Master of Computer Applications (MCA) – JNEC, Aurangabad (2021–2024)

Bachelor of Computer Science (B.S.A) – Hi-tech College, Aurangabad (2018–2021)

CERTIFICATIONS

- Docker & Kubernetes – Udemy
- DevOps Essentials – Linux Academy
- GitOps with ArgoCD – KodeKloud
- AWS in Plain English – Udemy

ADDITIONAL HIGHLIGHTS

- Strong eagerness to learn and adopt new tools & practices.
- Familiarity with software development lifecycle (SDLC).
- Good problem-solving, collaboration, and communication skills.
